

FOR IMMEDIATE RELEASE

SHAREABLE INK PLATFORM AWARDED ONC-ATCB 2011/2012 EHR CERTIFICATION

Providers Can Now Satisfy Meaningful Use Requirements While Still Documenting on Paper

Nashville, TN (October 13, 2011) -- Shareable Ink®, a leading provider of cloud-based software to aid the transition from paper documentation to electronic health records (EHR), today announced that it has achieved 2011/2012 EHR Modular* ONC-ATCB Certification. The award designates the software as capable of supporting providers with Stage 1 Meaningful Use (MU) measures required to qualify for funding under the American Recovery and Reinvestment Act (ARRA). Shareable Ink was certified as an Ambulatory EHR Module on September 30, 2011 under ICSA Labs' ONC-ATCB Electronic Health Record program and is compliant in accordance with the criteria adopted by the Secretary of Health and Human Services.

The certification means that any physician working in ambulatory care settings whether a practice or an ambulatory surgery center, can now use digital pen and paper to help satisfy MU requirements.

Shareable Ink President and CEO Stephen S. Hau said the company will pursue certification of additional modules as well as Inpatient EHR certification. "This certification supports our mission of helping healthcare organizations become more electronic without disruptive changes to clinical or back-office workflows," Hau said. "Our powerful cloud-based approach modernizes traditional paper-based processes by making paper a keyboard-equivalent and does not require expensive or cumbersome IT projects."

ICSA Labs, an independent division of Verizon, offers vendor-neutral testing and certification testing. Its electronic health record certification and testing program provides verification that the certified EHR technology supports meaningful use, as well as helps health care organizations protect sensitive and private patient information.

The Shareable Ink Platform's certification number is 110049R00. The software meets the following certification criteria:

- 170.304c Record demographics
- 170.302e Maintain active medication allergy list
- 170.302g Smoking status
- 170.302o Access control
- 170.302p Emergency access
- 170.302q Automatic log-off
- 170.302r Audit log
- 170.302s Integrity
- 170.302t Authentication
- 170.302u General encryption
- 170.302v Encryption when exchanging electronic health info

About Shareable Ink

Shareable Ink helps healthcare organizations of all sizes transition to electronic health records without disruption to workflow or burdensome IT projects. Its cloud-based software platform incorporates natural input tools, including iPads and digital pen and paper technology featuring Anoto functionality. The resulting structured and clinically-encoded output populates the EHR with discrete data, as if typed in directly. Built-in analytics give hospitals and practices insight into their operations -- from a clinical, quality and efficiency standpoint -- all previously inaccessible from traditional paper records. For additional information, visit www.shareableink.com.

About ICSA Labs

ICSA Labs, an independent division of Verizon, offers third-party testing and certification of security products and network-connected devices, such as printers and faxes, to measure product compliance, reliability and performance to many of the world's top security vendors. Visit <http://www.icsalabs.com> and <http://www.icsalabs.com/blogs> for more information.

About ONC Certification

The ONC-ATCB 2011/2012 certification program tests and certifies that EHR technology is capable of meeting the 2011/2012 criteria approved by the Secretary of Health and Human Services (HHS). The certifications include Complete EHRs, which meet all of the 2011/2012 criteria for either eligible provider or hospital technology and EHR Modules, which meet one or more — but not all — of the criteria.

** This Ambulatory EHR Module is 2011/2012 compliant and has been certified by an ONC-ATCB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments. Shareable Ink was certified on September 30, 2011. CHPL Product Number: EHRX-110049R00-2011.*
